

5. Performance Testing

Testing Focus Areas:

Test Type	Goal
-----------	------

Functionality Testing	Check formula fields & automation
-----------------------	-----------------------------------

Trigger Testing	Verify total cost updates on insert/update/delete
-----------------	---

Flow Testing	Validate automatic delivery date update
--------------	---

Validation Test	Ensure wrong data cannot be entered
-----------------	-------------------------------------

Load Behavior	Verify object handling with bulk records
---------------	--

Dashboard Response	Ensure analytics loads quickly
--------------------	--------------------------------

Results:

Data integrity confirmed

Trigger calculation accurate with bulk items

Flow executes correctly without delay

UI performs smoothly across screens

Reports produce correct grouped totals
